

BZBF Gasomizer

Reduces $\pm 30\%$ gas consumption (depends on welder skill) during non-continuous & spot welding process. Brass precision machined Multi Stage Regulator with Stainless Steel Case Content Pressure Gauge & Integrated Flowmeter.

Provide constant level gas pressure & stable gas condition around the weld.

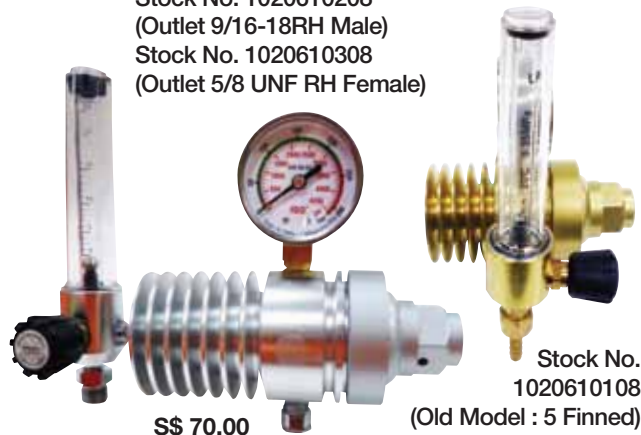

Stock No. 1020615207
 S\$ 96.00

BYFC Defrozo

Specific Design with Defrost Finned for Carbon Dioxide (standard/ non shiponed tube cylinders) application, enable high-flow and adequate pressure. Consistent gas flow for continuous welding process and core wave application.

In addition, stock of different electric input heater regulator are not necessary, which prevent mis-used & damage. Thus down time is saved with increased productivity.

Stock No. 1020610208
 (Outlet 9/16-18RH Male)
 Stock No. 1020610308
 (Outlet 5/8 UNF RH Female)

Stock No. 1020610108
 (Old Model : 5 Finned)

BYF CNG

Accurate & Extra Durable Defrost Finned design to enable continual gas flow precision built to latest BS EN ISO2503 & BS EN7291.

Leak proof, anti rust, easy to clean and read. Brass anodized solid Aluminium Alloy Finned body, baked paint Alloy die forged Zinc-Alloy Bonnet.

Stock No. 102052001C S\$ 56.00

CNG-107 Nozzle

Oxy-CNG Nozzle Mix CNG-107 Cutting Nozzles are manufactured in two pieces of Brass Inner with splines and a hollow drawn copper outer sheath. The construction technology optimise a good balance Oxy-CNG mixed volume to achieve the usable heat for clean cut.
